COUGHS COLDS AND CONSUMPTION.
N. H. DOWNS.

Vegetable Balsamie Elixir.

NE of the ment certain and sure remedies, for coughs, colds, consumptions, whooping cough, sethens, enterth, croup, and all disasses of the lungs, which has as a been offered to the public.

This Flight, unlike any of the cough remedy, is the result of long experience by the proprietor in his own case, who, is the year 1977, was given over by his friends and physicians as in a condituded consumption (with bleeding at the lungs) by which disease the year previous, he had lost two brothers. Since that time it has been administered to thousands with unparalled success, as may be seen by reference to the few certificates subjoined to the pamplet attached to each bottle, and may be hed of agents without charge.

It does not operate as most cough medicance do, relieving the patient for a few days, after which they lostle it, leaving the cough must tight thus before the coutrary does not stop the cough instantly, but can blee the patient to throw off the tough phiem without lacerating the lungs, while nature and the healing qualities of the clizer, by removing all method is retained and inflammation from the lungs to the surface, and finally expels it by perspiration, and otherwise will effect a cure, and the patient during the mean time will become attached to it, by which means and perseverance, many valuable lives have been naved.

A few certificates are added to convince the most incredictions of the superiority of this medicine over any other in use, while it is recommended to those suffering other in use, while it is recommended to those suffering other in use, while it is recommended to those suffering

A few certificates are added to convince the most averaging of this medicine over any other in use, white it is recommended to those suffering to "seed, try, judge," and then "speak as they find."

Messes Curties & Russell.—I cannot fortune to inform you of the result upon one of my children from the use of "N. H. Down's Vegetable Balsamic Klizer." Some

time last winter I was on a visit to my father-in-law in Jerice, with my wife and children, when there, the youngest son took a violent cold, which resulted in an affection upon the lungs, which hid fair to terminate its life in a short time. The advice of a regular physician, and others, having been obtained, which appeared of no service to the little sufferer, as the last report I could think of, I was induced to ride twenty miles and ob-tained a bottle of the Elixir. Upon my return I went immediately to administering it, and in a short hour the child began to breath more freely. I still persevered until evening, when it was apparently recover-ng fast. And although a few hours before the child was supposed to be past all recovery, it was but three days before we were enabled to return home with the child, which soon regained its usual health, and has

You will therefore, consider that I can but discharge a debt of gratitude in informing you of the particulars the whole of which I ascribe to the virtue of the med-icine. HIRAM C, BRUSH.

St Albans, June 15, 1737. This may certify that my wife Mary Green, had been deaf is one ear 27 years, occasioned by the mea-eles, for which she in early life used many remedies in vain. But being of a consumptive habit, was induced to take a bottle of "Rev. N. H. Down's Vegetable Balsamic Elizer," and to her astonishment, before using one bottle, her hearing was restored entirely expressing herself thankful that she is able to converse freely with her family and friends. And although much wasted with severe cough, she has, by taking three bottles, been so far restored as to be able to attend to her domestic duties.

JOB GREEN. estic duties. St Albans. July 12, 1836.

St Albans. July 12, 1836.

This may certify that for eighteen months, previous to the spring of 1837, I was troubled with a severe cough, which threatened to terminate in a consumption, and I was so unwell that I was obliged to give up all business, at which time I concluded with some reluctance, to try the affect of the theu new medicine, N. H. Down's Balsamic Elixer, when to my surprise, and that of my family, I began rapidly to recover, and in a few weeks was able to resume my business. But this was not all. For a great number of years I had been partially deaf, caused by a cold, and our astonishment was still increased to find that my hearing has been entirely wed which I attribute entirely to the use of their elizir, and I have since enjoyed good health.
NATHANIEL PIERCE.

NDIAN VEGETABLE UNIVERSAL PILLS, or IN-DIAN PURGATIVE, of the North American College of Health; established is Washington. D. C., January 8, 1826, FOR THE CURE OF ALL DISEASE.

Sign, FOR THE CURE OF ALL DISEASE.

The beautiful and simple theory of one disease and one roundy, as practiced by our antire Indians, and advocated by the North American College of Health, is beginning now to be generally understood. Thousands who have burstofore maintained the necessity of a peculiar medicine for every particular disease, now as streneously contend, that as all our uniadies proceed from one cause, so one medicine, capable of removing that cause, will cure every disease incident to man.

If disease of the head, or the feet, or the lungs, liver, &c. each require a peculiar kind of medicine to heal them, would not those parts each require a perticular kind of food for their sourishment! But as we know that good, wholesome food mourishes all parts of the system alike, it is manifest therefore, that a good and proper vegetable medicine will, by purifying the blood, search out and remove disease from every part of the body.

According to the Natural or Indian theory, all our complaints owe their origin to one cause, vir. the shutting up of those cuticits, (the skin, kidneys and howels) through which nature has intended that all currupt and useless master shall be carried from the body. When these become closed, it is like the shutting up of a water course; either the accumulated waters find a new outlet, or the country becomes insundated; just so with the human hody; if the natural drains become closed, the humors accumulated in the system, and either find vent in the form of various diseases, such as fevers, rheumatism, cutaneous cruptions, gout, Ac. or appoplery and death ends the scene. The only sensible method, therefore, of preventing and curing disease, is to keep the body continually purged of all the unless and certopt humors; and for this purpose no medicine will be found as effectual, as the Indian Purgative, because it is the only one whose power extends to the opening of all the matural crasss or the nooty. Whinst moder the function of the purpose of the sangular medicine, the body will

purify itself.

One very common objection urged by some who but partially understand the principle of curing disease by pargation, as promaignted by the North American College of Health, is that although relievated purging will cure disease; yet, that the repeated exercising of those organs will injure or destroy their tone. Those who raise objections appear to forget, that purging is as astural to the howels as walking is to the feet or labor to the hands; and like every other function most be duly exercised in order to retain ther energies.

What man in his somes would think of depriving his children of exercise, in order that they might be strongtheored by inactivity? And yet this absordity is no greater, than the infutuation of those who imagine the bowels can be injured by performing their natural functions; or that discuss can be cared by any other medicine than such as will remove the cause from the hody.

Nature is constantly giving us examples of the sulptary effects of purging. We find her perseveringly employed, not only in carrying off the residence of the natural fised, by the daily executions of the bowels; but we frequently one her, by a natural distribute, cure some of our most obstituate complaints.

Nature, by always adopting this one pice in the cure of issue, points most emphatically to the course she would neve up pursue. But recent to say in the most inviting namer, count, follow my example; cause using those migral modicines, which serve only to ring the wheels of life; and their stead use Vegetable Purgatives, which being strail to our countriestens, are, in truth, the medicine of hand Health.

finish, corrected the action of vegetable at by what mysterious process the bland is to maked to deposite its impurities into the bowels; it argues are excited in evacuate the corrupt hobody; all can nederated when they appropriately in the contents who compare the North Idealth weak therefore currently informationers of any kind, to make They beg leave to as

time so justly indunced, that they may be taken at all times, and under all circumstances with perfect safety, and an deac, however small, but will afford sense relief; and so quantity however large, if it he such as as required to open the leavels) can pessally injure.

Amisting Nature absorbs be soor chief study, and for this persons, the fodian Purgative will be found the most effectual medicine ever affered to the public. Its power being always directed to the meaning of those drains, through which nature carries out all importation from the body, it affords precisely the amount of assistance she requires to eachie her to cure every safety of disease. It being a regulation, at it always the right medicine to be administered. A single dust will in most cares afford relief and, if persevered with will always effect a cure.

In using the Indian Purgative, (or Indian Vegetable Pills,) no care is encounty, except in taking such as shall operate frontly upon the homels. If this effect is obtained, every other function will be dury performed. The skin and kid areys will cach be attenuated to discharge their portion of imporities; and the energy, imparted by this extraordinary medicine to the blood, will exhabit that fluid to disengage and depose to the impure particles into the bowels; from whence they will be carried off by the regular action of those organs.

whence they will be extried off by the regular action of those organs.

One great advantage, postessed by the Indian Pills over every other medicine is, that as they cure disease upon natural principles and said all complaints, they are always the right medicine to be administered, and, consequently, can never be taken impreperly; therefore, no time should be lost in listening to contradictory advise; the only impury should be; is the person sick? I is so, the sconer a few doses of the Indian Pills are administered, the sconer will the patient be restored to bealth and usefulness.

Extract of a letter from the Agent in Portland, Jan. 17, 1839.

1839.

"We do not know of a solitary instance where they have been tried but with complete satisfaction, and with such proofs we think the sale will be very extensive."

Extract from a hetter from the Positimaster at Hindgwater, Mass. Jan. 31.

"They are altogether preferable to Brandreth's Pills.—
The Pergatives have the preferable in this vicinity. I have used some of the Pills and think they are the best I ever used."

Extract from a letter from the Agent in Montpelier, Vt.

Extract from a letter from the Agent in Montpelier, Vt.

"One of my Sub-Agents in ordering a new supply, says—
I want more Pilis—they begin to sell fast, and give the best
astisfaction of any medicine sold here. All who have used
them have received great benefit, and say they never use
medicine equal to them."

Extract from a letter from the Agent at Winchester, N. H.

"I wish you to send 10 boxes of your Indian Purgative
Pills. The call for a few weeks has been great for them.—
One young man in this place that the doctors pronounced
far gone in consumption, thanks he is nearly cured by using
them, which gives them great credit in this place."

Certificate of Joseph Henderson, who resides at the corner
of Belcher's lane and Purchase street, Boston.

"This certifier, that I have been afflicted with the Piles,
for three or four years, and part of the time they have been
very troublesome. I have tried various kinds of medicine
to little or no effect. Seeing an advertisement highly recommending the Indian Purgative Pills, and after using two
boxes, find myself entirely relieved, and think I am quite
cured.

JOSEPH HENDERSON."

Pressured (1980s, for the New Years)

Boston, Sept. 20, 1239.

Dr. Cooke.

The unfortunate are respectfully informed that the Albany Lock Hospital, established and modelled after the much celebrated European Lock Hospitals, has many years since been founded at Head Quarters, No. 3 Norton street, Albany, N. Y. To those unacquainted with this institution, it is necessary to mention that it has for its object the care of all such diseases as syphilia, scrafula, strictures, diseases of the unetha, lumbago flour albus impotency, diseases of the womb, semigor lour albus impotency, diseases of the womb, seminal weakness of both sexes, nodes, aries of the bones, ghon-orrhoxa, gleets, with all venereal complaints in general

Persons, ignorant of the nature of disease, are not a-most simple form, and through neglect or injudicious treatment, assumes a more aggravated state of disease, and occasions abscess, niceration, psuedo syphilis, can cer, premature old age, too often ending in a protracted incurable state of existence.

This institution is under the superintendance and

This institution is under the superintendance and management of Professor Cooke, M.D. D.D. L.L.D. of the city of Albany, N. Y., who will give his personal attendance at the Dispensary, attached to the institution, at all hours, to invalids requiring his professional services. He having had much more experience in this branch of medical practice than usually falls to the lot of any one member of the profession, therefore feels such confidence of his ability to give universal satisfaction that he assess all applicants none need despair of a complete recovery.

a complete recovery.

The unfortunate therefore, who have suffered from The unfortunate therefore, who have suffered from the want of success by those less experienced, are invited to visit the Hospital, which only requires to be known to be sure of support, where the most perfect secresy may be depended on, and the utmost privacy will attend those who sall. The whole house is exclusively apprapriated to the use of patients, who will always be received into separate apartments, and at no time, unless at the request of the patient, will a third party be unless at the request of the patient, will a third party be

Professor Cooke has a number of handsomely furnish ed private chambers at No. 33, Greene st. where he will receive gentlemen who may require medical aid. Residing himself on the premises, he will thereby be enabled to dedicate more than ordinary attention to his patients. Gentlemen will find it both convenient, as well as economical, in all cases of disease, to retire to

these furnished rooms.

As long as Professor Cooke desires to benefit the pub As long as Professor Cooke desires to benefit the pub-lic, it is proper he should continue his advertisemen-for the good of strangers, as it is well known that peop-le are extremely shy in speaking of cases of a delicate nature, even when a physician is pre-eminently success-

Communications, post-paid to the address of Professor Cooke, M. D. D. L.L. D., Albany, N. Y. enclosing a bank note as counselling fee, will have attention— (some other will be received)—or a personal consulta-tion may be had at all times, as usual, at the Dispensary which is properly fitted and arranged with separate of fices for confidential interviews.
